

# Phase Two of the building work

Sewells Construction are the contractors for Phase Two of the building project, they will be moving onto the original school site over half term. As part of their work with school they will be coming into school shortly after half term to work with the children in Sunshines, KS1 and KS2. They will be holding an interactive workshop with these groups and they will jointly decide on site rules, with the help of their safety mascot Ivor Goodsite.

This is to help all the children understand the need to be safe around building sites and considering all the building work going on in school and in Sherburn we think this is an essential message.

There will also be a competition for the children to design the site entrance sign which Sewells Construction will recreate for the main site entrance.

We will also be looking to decorate the hoardings erected around school to make them more children friendly

Over half term there will be changes on our site as Sewell Construction begin work. When we return you will see additional hoardings across the current playground. The new playground will have been completed on the extension grounds and children will, be using it straight away. All these changes mean that we will be able to have one playtime and one lunch time and not operate staggered sessions. It also means that we will be spending time showing the children how to move safely around site and to introduce them to the new fire exit routes.
